

INDUSTRIAS TÉCNICAS DE VALVULERÍA, S.A.

QUALITY POLICY OF INTEVA

1. The purpose of INTEVA is to design, manufacture and supply oil-hydraulic components that meet the requirements of its customers, ensuring the long-term viability of the company.
2. The continuous improvement of the quality must form an essential part for all the activities and reflections of the company, in such a way that it reaches all the products, processes and services and that is kept in an exemplary way in all the levels and areas of the organization.
3. The processes of INTEVA are defined, maintained, evaluated and continuously improved in a way that minimizes the possibility of defects appearance in its products. For this, the concepts of "prevent instead of react" and "eliminate defects at source" are followed.
4. The management ensures that the policy is appropriate to the organization and its targets, being reviewed periodically.
5. Every effort will be made to comply with and exceed all regulations and legislation in force applicable to the organization.
6. The Company Management guarantees that this policy is understood, applied and maintained by all personnel, providing them with the necessary equipment, means, environments and training.

En Santa Perpetua de Mogoda, en mayo de 2010

Emilio Gordillo Vicedo
